Gift Uhiene

Software Developer and Technical Writer

eleojogiftuhiene@gmail.com | [LinkedIN](#) | [GitHub](#) | [Portfolio](#) | [Blog](#)

SKILLS

HTML5, CSS3, JavaScript, Reactjs, Nextjs, TypeScript, Vite, RainbowKit, Node.js, Supabase, Redux, Tailwind, SASS, Solidity, Rust, Ethers.js, Foundry, PlayWright, Jest, Docusaurus, Gitbook, Markdown, Docker, Vercel, Git, SEO, Analytics.

EXPERIENCE

CHAOSS

- **Frontend Developer** (Open-source contributor)   **Dec 2023 – present**
  - Contribute to the CHAOSS community as an active member, focusing on frontend development, community management and open-source best practices. Building the Badging project.
  - Improved documentation and onboarding processes to support new contributors and promote community engagement.
  - Participate in discussions and projects to align CHAOSS goals with the needs of open-source communities and stakeholders.

Koii Network | Remote

- **Web3 Frontend Developer & Technical Writer**   **Oct 2022 – Jul 2024**
  - Single-handedly led the initiative and migrated the documentation site from Gitbook to Docusaurus, which led to a 20% increase in developer engagement.
  - Connected frontend apps to smart contracts using Ethers.js, facilitating seamless integration with blockchain technologies.
  - Built reusable code components, reducing development time for new projects by 10%.
  - Ensured cross-browser compatibility using tools like Google PageSpeed Insights and BrowserStack, leading to a 10% reduction in browser-specific issues.
  - Optimized web pages for maximum speed and scalability, resulting in an 8% improvement in load times across multiple projects.
  - Developed and executed comprehensive unit tests, improving overall code reliability and reducing the incidence of post-release defects by 6%.
  - Built projects using the Koii Task Template and authored comprehensive step-by-step tutorials on how to build the projects. Projects: ERC20 Reward Distributor and JavaScript Web Scraper
  - Collaborated closely with the Head of Ecosystem Projects to provide technical support for 20+ ecosystem developer teams building products hosted on Koii's nodes, ensuring seamless integration and troubleshooting technical issues.

SubSocial | Remote

- **Web3 React Developer**   **Jan 2022 – April 2022**
  - Built responsive and user-friendly web interfaces for the Subsocial web wallet and dapp using React and Typescript.
  - Collaborated with team members to build and add new complex features to the SubId wallet.
  - Wrote unit tests using Jest to ensure code quality, reducing the number of post-deployment bugs by 5%.
  - Integrated analytics tools to monitor and analyze web performance, providing actionable insights that improved user retention by 12%.

Loctech | Hybrid

- **Frontend Developer**   **Jan 2021 – Dec 2021**
  - Collaborated with a cross-functional team to develop Enterprise Resource Planning (ERP) applications for leading engineering service companies in Nigeria.
  - Wrote automated tests to ensure the efficiency of the code.
  - Built landing pages with WordPress, HTML, CSS, and Jquery for SMEs to increase the conversion of their offerings.
  - Engaged with business owners to define the scope of their business application.

Zebullon | Remote

- **Frontend Developer**   **Sep 2020 – Dec 2020**
  - Built landing pages with WordPress, HTML, CSS, and Jquery for SMEs to increase the conversion of their offerings.
  - Engaged with business owners to define the scope of their business application.

PROJECTS

SavingHistory - [Link](#)

- An application layer protocol designed to protect endangered heritage of different tribes worldwide.

Near-Tours - [Link](#)

- A group tour application, where users can drop comments on experience.
